## SUPPLY CHAINS IN SYNC

### CONTAINER INSPECTION CHECK LIST and GUIDELINE

Prior to loading the container, Vendor/Warehouse must inspect and verify:

- (1) The container structure is intact (e.g. no false walls, floors, or tampering evident in the physical structure)
- (2) The locking mechanism of the doors is in good working order
- (3) The container must be free of pests or any visible matter on the floor. If found, either clean or return container.
- (4) If container is a temperature-controlled (refrigerated) unit, it must arrive at specified temperature applicable to the shipment and temperature at arrival must be recorded below at time of arrival and again at time of departure from stuffing location.

Container Number: (4 character alpha + 7 numeric): \_\_\_\_\_ TTNU8356378 \_\_\_\_\_

By checking the boxes and signing below, the undersigned certifies that he/she physically inspected the container designated above on the \_\_\_\_30\_\_\_\_ day of \_\_\_\_\_10\_\_\_\_\_, 2025\_, and verifies the container structure is intact and free from tampering and that the locking mechanisms on the doors are in good working order and reliable. The undersigned also certifies that any solid wood packaging materials have followed the guidelines of the USDA Wood Packing Materials (WPM) regarding treating and fumigating. If container is a temperature-controlled (refrigerated) unit, the undersigned also certifies that the temperatures noted upon arrival and departure are accurate.
